-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones in view of Adamczyk. Jones discloses the basic claimed structure including a personal watercraft with an engine 22, a jet propeller 38, a jet nozzle 52, a steering nozzle 54, wherein the bottom surface of the stern of the watercraft has a rearwardly upward gradient (note Figure 1, for example, at 26). Not disclosed by Jones is the jet propeller being set with a rearwardly downwardly gradient. Adamczyk teaches a jet propeller being set with a rearwardly downwardly gradient for improved stability. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Jones with the jet propeller being set with a rearwardly downwardly gradient for improved stability as taught by Adamczyk.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tattersall shows a steering device. Nanami shows a propulsion system.
